

Safety Data Sheet

1.1. Product identifier

MINWAX® Paste Finishing Wax

2.1. Classification of the substance or mixture

Flammable solids - Category 1

Specific target organ toxicity (single exposure) (Respiratory tract irritation) - Category 3

Specific target organ toxicity (single exposure) (Narcotic effects) -Category 3

Specific target organ toxicity (repeated exposure) - Category 2 aspiration hazard - Category 1

Percentage of the mixture consisting of ingredient(s) of unknown acute toxicity: 68.3% (oral), 68.3% (dermal), 68.3% (inhalation)

2.2. Label elements

Signal word

Hazard statements

Flammable solid. May be fatal if swallowed and enters airways. May cause respiratory irritation. May cause drowsiness or dizziness. May cause damage to organs through prolonged or repeated exposure.

Precautionary statements

General:

Read label before use. Keep out of reach of children. If medical advice is needed, have product container or label at hand.

Wear protective gloves, protective clothing and eye or face protection. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Use only outdoors or in a well-ventilated area. Do not breathe dust.

Response:

IF INHALED: Remove person to fresh air and keep comfortable for breathing. Call a POISON CENTER or doctor if you feel unwell. IF

SWALLOWED: Immediately call a POISON CENTER or doctor. Do NOT induce vomiting.

Storage:

Store locked up. Store in a well-ventilated place. Keep container tightly closed.

3.1. Personal protective equipment (PPE)

Eye/face protection

Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields.

Skin/hand/body protection

Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. When there is a risk of ignition from static electricity, wear anti-static protective clothing.

Respiratory protection

Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.
